- SQL & Database Management (PostgreSQL, Redshift)
- Data Cleaning, Validation & Quality Assurance
- Excel Automation & Data Integration
- Problem-Solving & Analytical Thinking
- Cross-Functional Collaboration & Communication
- Process Improvement & Workflow Optimization
- Attention to Detail & Data Accuracy

SUMMARY/OBJECTIVE

Highly experienced people-oriented data professional with a demonstrated history of supporting a variety of customers/clients and managing large-scale complex databases. Skilled in collaborating with cross-functional teams to design interactive dashboards resulting in improved decision-making processes and a reduction in data analysis time. Skilled at optimizing visualizations based on user feedback and data analysis, driving increased user engagement and satisfaction.

WORK EXPERIENCE

Database Analyst // Hay House Inc., Carlsbad, CA

December 2022 - Current

- Analyzed, optimized, and maintained internal databases, resolving complex data issues to ensure accuracy, reliability, and minimal disruption to users.
- Designed and developed interactive dashboards and visualizations translating complex data into actionable insights for global stakeholders.
- Automated and streamlined data workflows, including integrating Excel with PostgreSQL Redshift, significantly improving efficiency and refresh speed.
- Collaborated cross-functionally to deliver analytical support, technical training, and data-driven recommendations aligned with business goals.
- Standardized processes through detailed SOPs and optimized database structures, enhancing data consistency, performance, and team productivity.

Data Specialist// CEMEX, West Palm Beach, FL

December 2021 – November 2022

- Cleaned, validated, and analyzed source data using SAP to ensure accuracy and completeness.
- Entered and maintained numerical data across multiple systems with high precision and efficiency.
- Resolved data discrepancies through independent problem-solving and thorough quality reviews.
- Compiled and managed confidential data, upholding strict organizational privacy standards.
- Monitored and improved data quality to prevent errors and support team performance goals..
